Charleston, WV 25311

- One Sun Properties

1553 Virginia Street East

and 1550 Kanawha Blvd East

Charleston, WV 25311

4) Supporting Documentation-

Description of proposed work to be done on the property. The proposed work includes a newly constructed addition to the exiting building of approximately 1000-1300 square feet and includes a garage. The project includes the replacement of existing windows to match windows in the new construction.

What measures are being taken to retain and preserve the historic character of the property? The existing property was constructed in 1963. It is identified in the Design Guidelines for the East End Historic District- City of Charleston- Adopted 9/16/2021. In the publication the structure is identified as a departure from the character of the district in terms of its design, color palette and placement on the lot. The new construction will correct these aspects by bringing the front façade forward to fill the gap in rhythm, change the period style of the building to style congruent with those existing in the District.

How are the distinctive, character-defining features of the structure being affected or altered by the proposed work? The existing structure is mid-century in style, out of character with the District. The proposed new construction presents a historical period style tying in the existing structure through design, fenestration, materials finish, color palette, and details.

Is the work planned in accordance with substantiated documentation, physical or pictorial evidence? Attached photo of the existing structure from the Design Guidelines for the East End Historic District- City of Charleston- Adopted 9/16/2021.

Does any proposed new construction honor historic materials that characterize the property and conform to the massing, size and scale of the historic environment? The proposed new construction will honor historic materials and finish as well as changing the existing structure to conform to historic finish of the District. In addition, one intention of the proposed new construction is to adjust the scale of the building to align and complement the exiting adjacent buildings.

**Proposed New Construction for 1555 Virginia Street, East
Charleston, West Virginia**

This property, built in 1963, is not considered a contributing structure in the East End Historic District. The property is a departure from the character of the district in terms of time of construction and architectural style of the edifice. Additionally, the existing home is identified by the Design Guidelines for the East End Historic District, adopted 9/16/2021 as a departure from the district in terms of its design, color palette and set back. The guide also states that the current edifice creates a gap in the rhythm and massing of Virginia Street.

This proposed addition demonstrates sensitivity to the two adjacent homes in terms of the existing variation of architectural styles and massing. Its intention is to provide a non-obtrusive and transitional addition to fill the 'gap in rhythm and massing' but does not obscure the unique architectural details of the adjacent homes.

- The architectural style for the proposed, new construction is a façade with a hint of Chateausque. This style would be continued on the newly constructed sides of the building and integrate with the existing structure to the rear of the lot.
- The new construction proposed for the primary and secondary facades would continue the existing masonry, incorporating quoining on corners, all finished in limewash; some secondary exterior surfaces will be clapboard matching in color
- The 1-story new construction would include approximately 1000 square feet of interior space with 10' ceilings, a 24'X 36' garage/ carport on the northwest side, and an uncovered front porch/ patio, approximately 450 square feet
- The new construction would include metal details in front railing at exterior steps and patio, canopy above front door and double hung windows with muntins and shutters
- The new construction would include a roof to match existing asphalt shingles

Although this plan proposes a *possible* variance by positioning the garage/ carport area in the middle of the lot vs. 'to the rear of the lot', the existing back yard is not large enough to allow for a 2-car garage without a variance of the rear property offset.

This Proposal is being presented by:
